

Corporate Overview

Linking Technology to Business Transformation

Overview

CyberlinkASP is the trusted **Advanced Solutions Provider** for small and mid-size businesses, specializing in cloud and IT solutions with a commitment to data security, business continuity, and 24x7 US-based support. Our team of IT experts delivers secure, compliant solutions tailored to each client's unique technology needs, enabling access to any application from any device, securely and cost-effectively. CyberlinkASP empowers businesses to achieve seamless growth with the peace of mind that their IT needs are fully covered.

Our experienced IT team brings decades of knowledge to every engagement, offering hard-to-find skill sets at a fraction of the cost of hiring in-house. Trusted by over a thousand of SMBs nationwide, we provide tailored, award-winning solutions that address common challenges and empower businesses to confidently invest in technologies that drive growth, efficiency, and security. Through proven strategies and a customer-first approach, we continue to deliver transformative IT solutions that support long-term success.

Solutions

CyberlinkASP specializes in building modern, compliant, secure solutions tailored to client needs, leveraging ideal application and cloud technologies to fit business goals and budgets. As one of the nation's largest Virtual Desktop providers and Citrix's Partner of the Year (2023), we enable businesses to securely and cost-effectively access any application from any location on any device. Our services include hosting and supporting essential applications like Microsoft 365, Microsoft Dynamics, Sage, and SYSPRO, empowering small and mid-sized businesses to offload application management while preserving years of customization.

Industry Expertise

Our solutions are designed to help businesses comply with strict regulations like HIPAA, GDPR, and CCPA, protect data, and maintain operational continuity. By providing 24/7 US-based support and guaranteeing 99.99% uptime, we ensure critical systems for hospitals, law firms, utilities, and other organizations remain reliable and secure. Our proactive monitoring and expert support deliver peace of mind and a personal touch, ensuring potential issues are resolved before they escalate.
